

Project Initialization and Planning Phase

Date	28-09-2026 to 20-09-2026
Team ID	SWTID-2026-9565
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement from the ServiceNow Incident Management user's point of view. Incident records need consistent information for effective triage, routing, reporting and resolution. Manual entry and manual checking can lead to incomplete or incorrect data.

I am	I'm trying to	But	Because	Which makes me feel
A Service Desk / Incident user	Create and update Incident records correctly	Required or valid information may be missing	Manual entry can cause inconsistent values	Concerned about incorrect submission

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS 1	A Service Desk / Incident user	Create and update a valid Incident	Some fields may be missing or incorrect	Manual entry needs consistent controls	Uncertainty about incorrect submission

Main Problem Statement

How can the ServiceNow Incident form enforce required information, control field behaviour based on Impact, validate user actions before saving, and prevent unauthorized State changes through direct list editing?
