

Scalability & Future Plan

Date	28-09-2026 to 30-09-2026
Team ID	SWTID-2026-9565
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Future Enhancements

No.	Enhancement	Future Scope
1	Additional UI Policies	Add policies for other Incident conditions and priorities.
2	More Client Scripts	Extend client-side validation for additional fields.
3	Automatic Field Population	Add further automatic field updates.
4	Server-side Validation	Add stronger server-side enforcement.
5	Notifications	Add notifications for critical or high-impact Incidents.
6	Automated Assignment	Automatically assign Incidents based on rules.
7	Dashboards and Reports	Create Incident analysis dashboards.
8	Advanced Workflow Automation	Extend Incident workflow automation.
9	More Field Validation	Extend validation rules to additional fields.
10	Module Integration	Integrate Incident controls with other ServiceNow modules.

Scalability Direction

The current project is focused on the Incident table and client-side behaviour. Future versions can retain the existing controls while adding server-side validation, workflow automation, notifications, reporting and integration.
