

Solution Architecture

Date	28-09-2026 to 30-09-2026
Team ID	SWTID-2026-9565
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	_____

ServiceNow User

Service Desk / Incident User

↓

Incident Form / Incident List

Impact • Assignment Group • Assigned To • Urgency • State

↓

Client-Side Control Layer

High Impact UI Policy • UI Policy Actions • onChange • onSubmit • onCellEdit

↓

Validation & Behaviour

Mandatory • Read-only • Auto-update • Save validation • List edit blocking

↓

Incident Record

Complete, consistent and controlled data

↓

Configuration Architecture

Layer	Component	Responsibility
Presentation	Incident Form / List	Collect user input and expose Incident fields.
Policy	High Impact Control	Detect Impact = High and apply field rules.

Automation	onChange Client Script	Set Urgency automatically.
Validation	onSubmit Client Script	Check Assigned To before saving.
List Control	onCellEdit Client Script	Block direct State changes.
