

No. of Functional Features Included

Date	28-09-2026 to 30-09-2026
Team ID	SWTID-2026-9565
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Functional Feature Count: 8

No.	Functional Feature	Function
1	High Impact UI Policy	Triggers additional Incident field controls when Impact = High.
2	Assignment Group Mandatory	Makes Assignment Group mandatory for High Impact.
3	Urgency Read-only Control	Prevents manual Urgency changes while High Impact is active.
4	Automatic Urgency Update	Sets Urgency to High when Impact changes to High.
5	Assigned To Save Validation	Prevents High Impact save when Assigned To is empty.
6	State List Edit Blocking	Prevents direct State changes through Incident list editing.
7	Form-based State Update	Allows State changes through the Incident form.
8	Reverse Condition	Reverses UI Policy field changes when Impact is no longer High.

Functional Coverage

The eight features cover conditional field control, automation, validation, controlled list editing, valid form updates and reverse-condition behaviour.
