

Sample Project Documentation

Date	28-09-2026 to 30-09-2026
Team ID	SWTID-2026-9565
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Recommended Documentation Structure

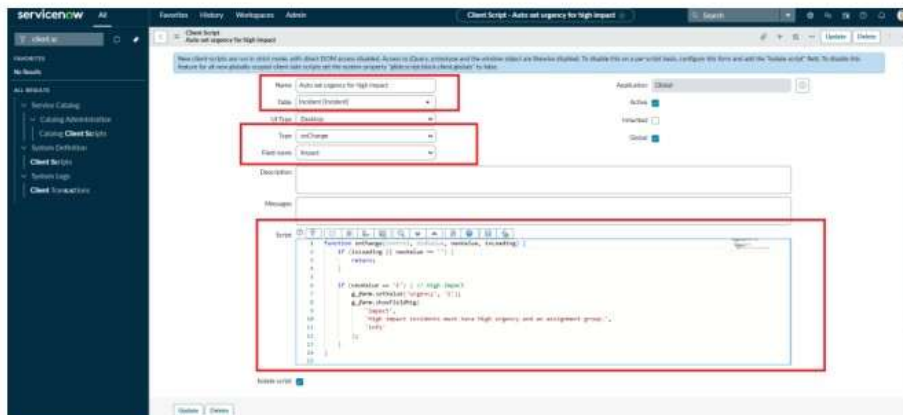

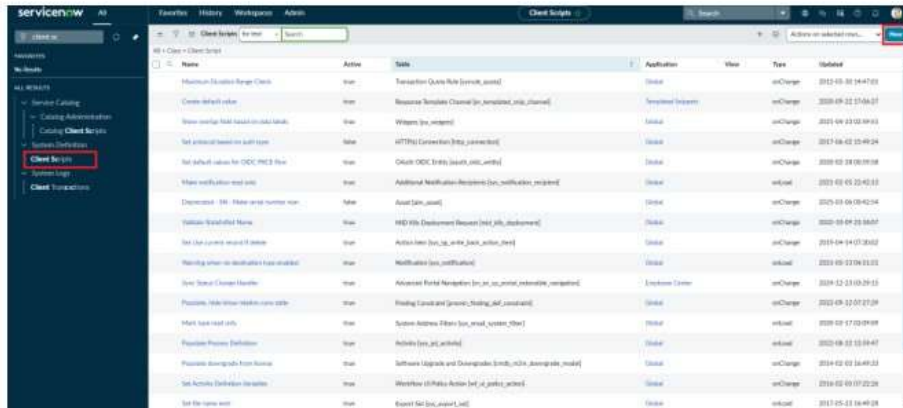

This sample follows the supplied project document and organizes the implementation into a clear submission flow.

Section	Content	Purpose
1	Project Title / Problem Statement	Define the Incident data-quality problem.
2	Objective	Explain the use of ServiceNow client-side controls.
3	Skills and Concepts	Incident Management, UI Policy, UI Policy Actions, Client Scripts, Form Validation.
4	Scope	High Impact controls, Urgency automation, Assigned To validation, State list-edit control.
5	Technology / Requirements	ServiceNow, Incident Management, JavaScript, browser, configuration access.
6	Implementation	UI Policy + UI Policy Actions + onChange + onSubmit + onCellEdit.
7	Testing	Mandatory, successful save, reverse condition, list edit blocking, form-based update.
8	Expected Results	Valid, consistent Incident records and controlled user actions.
9	Advantages / Limitations	Improved data quality with client-side scope limitations.
10	Future Enhancements / Conclusion	Additional policies, validation, server-side checks, notifications, automation, dashboards.
