

Solution Requirements

Date	28-09-2026 to 30-09-2026
Team ID	SWTID-2026-9565
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Functional Requirements

ID	Requirement	Description
FR-01	High Impact UI Policy	Trigger when Impact = High.
FR-02	Mandatory Assignment Group	Make Assignment Group mandatory for High Impact.
FR-03	Urgency Control	Make Urgency read-only while High Impact condition is active.
FR-04	Automatic Urgency	Set Urgency to High when Impact changes to High.
FR-05	Save Validation	Prevent save when High Impact and Assigned To is empty.
FR-06	List Edit Blocking	Prevent direct State changes from Incident list editing.
FR-07	Form State Update	Allow State changes through the Incident form.
FR-08	Reverse Condition	Reverse UI Policy field changes when Impact is not High.

Non-Functional Requirements

Area	Requirement
Usability	Provide immediate and understandable feedback.
Consistency	Apply the same defined rules whenever conditions are met.
Maintainability	Use clear names and readable client-side logic.
Performance	Use lightweight client-side rules focused on required fields.
Control	Prevent unauthorized direct State changes through list editing.
